Experience

University of Georgia Small Satellite Research Laboratory

ATHENS, GA

Co-Founder, Program Manager, Systems Engineer

January '16 – present

The University of Georgia Small Satellite Research Laboratory (UGA SSRL) was founded when I decided to form a team to build a small 1U cube satellite. The UGA SSRL now includes over 40 undergraduate researchers, 5 graduate students, several faculty researchers, a space act agreement with NASA Ames, a partnership with the Air Force Research Laboratory (AFRL), and more.

MOCI

January '16 – present

The Multiview Onboard Computational Imager (MOCI) is a 6U cube satellite funded by the Air Force Research Laboratory's (AFRL) University Program (UNP) NS-9. The MOCI satellite shall use advanced computer vision algorithms and specialized computational hardware, based off of the Nvidia TX2i GPU/SoC, to generate 3D digital surface models of the earth in real time. The MOCI satellite is scheduled for handoff in Q2 of 2020.

SPOC

January '16 – present

The Spectral Ocean Color (SPOC) satellite is a 3U cube satellite funded by NASA's Undergraduate Student Instrument Project (USIP) and was selected for NASA's Cube Satellite Launch Initiative (CSLI) for a handoff in Q4 of 2019. The SPOC satellite shall use a custom hyperspectral sensor to analyze the coastal ecosystems of the Georgia coast.

NASA, National Aeronautics and Space Administration

HOUSTON, TX

Core Flight Software Programmer

April '15 – August '15

I helped develop Core Flight Software (CFS) to handle audio telemetry and communication for the Orion spacecraft in a simulated lab setting. I also worked in an audio lab with embedded systems for audio equipment.

Human Systems Integration

April '15 – August '15

While working in the Human Integrated Vehicles and Environments (HIVE) Lab I assisted with internal telemetry systems and general networking systems throughout Johnson Space Center. These systems were needed for future Graphic User Interfaces (GUIs) used while training astronauts.

Hodgson Glass Research Lab

ATHENS, GA

Undergraduate Researcher

August '14 – April '15

I assisted Dr. Johnson Turner with technical advice and programmed/designed environments for digital music systems.

Google Glass Development

August '14 – April '15

I helped develop the first [musical score viewing application](#) for Google Glass. This application was used in concert across multiple Google Glass units.

Smart Podium Development

August '14 – April '15

I developed a digital smart podium for the use of a band director. The goal was to allow synchronized music editing and notation.

The Home Depot Innovation Center

ATLANTA, GA

Research & Development Intern

April '14 – August '14

I worked as a software developer intern at The Home Depot's Innovation Center. I was part of the Center's first group of interns and helped to justify its existence within the company.

Google Glass Research & Development

April '14 – August '14

I developed an Augmented Reality Google Glass application using a low level OpenCV libraries and data structures. The goal was to assist with product recognition, allow for barcode scanning, and quick product searches.

Virtual Reality Research & Development

April '14 – August '14

I developed a Virtual Reality application with Google Cardboard using low level OpenCV libraries and data structures. The goal was to display heat maps of various product data over store shelves to assist with product placement.

Grants Funded

UNP NS-9, Phase B

University Nanosatellite Program, Nano-Sat 9 Phase B – \$600,000

2018

The Air Force Research Lab's Nano Satellite Program funded the UGA SSRL, as the winner of phase A, \$600,000 to build and operate the MOCI satellite.

UGA: CTL

The Design and Construction of Equipment for Ground to Space Communications – \$23,586

2017

An internally awarded by the Center for Teaching and Learning for the construction of a space ready ground station at UGA.

UGA: Parents Leadership Council

Providing Undergraduate Students Equipment for Ground to Space Communications – \$5,000

2017

An internally awarded by the Parents Leadership Council to help obtain ground support equipment for the Small Satellite Research Lab.

NASA USIP

The NASA Undergraduate Student Instrument Project – \$200,000

2016

The NASA Undergraduate Student Instrument Project funded the UGA SSRL \$200,000 for the design, construction, and launch of the SPOC satellite.

UNP NS-9, Phase A

University Nanosatellite Program, Nano-Sat 9 Phase A – \$180,000

2016

The Air Force Research Lab's Nano Satellite Program funded the UGA SSRL for \$180,000 to design and prove the mission architecture for the MOCI satellite.

*Grants listed above have me listed as an **author**, significant contributor, and/or essential personnel.*

Awards, Honors & Fellowships

Georgia Space Grant Consortium

Fellowship

2018

I was selected to receive a fellowship from the Georgia Space Grant Consortium. I was awarded 10k in total funding, this was used to further develop the UGA SSRL's high performance processing units.

UNP Phase B

Phase A Winner

2018

The MOCI satellite was selected as the winner of the 9th iteration of the University Nanosatellite Program, selected first out of 10 competing programs, and awarded over \$600,000 dollars in phase B funding.

TEDx UGA

TEDx UGA Student Idea Showcase

2016

I was selected as a presenter at TEDx UGA's student idea showcase. I spoke about the importance of space exploration, citizen science, and the democratization of space with small satellites.

HackGT

Top 8

2016

I led a team that won top 8 at Georgia Tech's Major League Hacking (MLH) Hackathon. We built a drone from scratch that planted seeds. We were selected among 500 of our peers.

NASA Johnson EV3

Team Excellence

2015

While working at NASA's Johnson Space Center I was awarded for going above and beyond requirements by staying late nights, and over night, to perform thermal vacuums tests on a payload.

VT Hacks

Winner

2015

I lead a team that won Virginia Tech's 2015 Major League Hacking (MLH) Hackathon. We built a remote operated telescope and competed with 1000 of our peers.

Leadership Experience

UGA Small Satellite Research Laboratory

ATHENS, GA

Co-Founder, Program Manager

2016 – Present

With two of my friends, I created the foundations of the UGA SSRL. I have sense lead it to receive almost a million dollars in funding as it constructs Georgia's first satellites.

Head TA - CS 1302 Software Programming

ATHENS, GA

Head TA

2018 – Present

The CS 1302 class at UGA is when most Computer Science students first experience significant programming. It takes them from simple terminal applications to complex GUI-based applications with large codebases. I manage a team of about 10 other TAs (varies by semester) who help run this class of 300+ students. I manage grading criteria, rubrics, coding projects, auto-grading systems, and hold office hours to help students understand the subject.

UGA Hacks

ATHENS, GA

Co-Founder

2015 – 2016

With two of my friends, I helped to create UGA's official Major League Hacking (MLH) Hackathon program, which still exists today. The organization helps get Computer Science students excited about programming by presenting them with difficult, relevant challenges.

UGA Redcoat Band

ATHENS, GA

Section Leader

2014 – 2015

I led the UGA Redcoat Band's trombone section. I helped organize events, conduit rehearsals, and teach music.
